

Illuminated Curved Laser probe with DORC® connector (25 gauge / 0.5 mm)

Ref. 7625.DORC

Dr. Andreas Mohr,
head of Ophthalmology Department
at St. Joseph - Stift Hospital,
Bremen, Germany

"Illuminated laser probes are for me the best tool to complete bimanual surgery in complicated cases i.e. diabetic tractional detachment. It allows to maintain good visibility and working in peripheral parts of the retina either by external indentation or by additional internal diathermy. Its bright and adjustable light power helps further in mild vitreous opacities like residual haemorrhage to orientate proper tapering of the tasks."

Features & Benefits:

- Multi-function laser probe
- Curved, designed for laser application to the periphery
- Ideal for 360 degree laser application
