

Disposable Microforceps: Eckardt End-gripping (25 gauge / 0.5 mm)

Article No: 1286.WD05

**Hyeong Gon Yu,
MD, PhD, South Korea**

**Professor in Ophthalmology, Seoul
National University Hospital**

“The pointed edge of the forcep really helps me grasp the ILM in one go; the grip and the control it offers is excellent, I use this forcep in all my membrane peelings, ILM, TRD and even in proliferative diabetic retinopathy cases, even though PDR ILM is well known to be adherent.”

- **Microforceps with ‘nail-like’ end-gripping platforms**
- **For precise grasping and improved visualization of thin membranes in the macular region**
- **Developed with Prof. M.D. Claus Eckardt**
