

## High Flow Viscous Fluid Extraction accessory

Article No: 1362.VFE2

**“The new high flow viscous fluid extraction 1362.VFE2 by DORC represents a very efficient solution for the management of silicone oil extraction. It allows me to perform a fast (it significantly shortens the time needed for the extraction) and safe surgery through 25G AVETA transconjunctival cannula system. Furthermore, it is fully compatible with all DORC AVETA cannula systems (23/25/27 gauge).”**
